2-1-2, Tsukuba, Ibaraki 305-8602, Japan (E-mail:tsasaki@abr.affrc.go.jp, URL:http://rgp.dna.affrc.go.jp/, Tel:81-298-38-7441, Fax:81-298-38-7468)
The orientation of the sequence is from $P6 to T7 of the PAC clone. Genes were predicted from the integrated results of the following:GENSCANI.0, BLASTN2.0, BLASTN2.0 as well as $P91icePredictor (October1998 version). The genomic sequence was sparched against the non-redundant database NRP(PIR.SWISSPROT, GENPEPT, PDB) from MAFF DNAbank and the CDNA sequence database at RGP. Protein similarities of the cording regions were searched against NRP with BLASTN2.0. ESTS represent the identified CDNA sequences using BLASTN2.0 with the corresponding DDBJ accession no.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  .16323,18384. .18477,19513. .20442))
